## About Abcam

Abcam, with offices in Cambridge, U.K., Cambridge, MA, U.S.A., Tokyo, Japan and Hong Kong was founded in 1998 by D.r Jonathan Milner, then a researcher at Cambridge University, U.K.

“Like many life science researchers, I was frustrated by the time it took to locate and select antibodies essential for my research. This was largely due to poor information and out-of-date catalogs from the vast range of suppliers who were spread across many countries. In some cases, I also experienced difficulties with companies whose products were unreliable and whose customer service was slow and unhelpful. My vision was to build a company that offered reliable cutting-edge products and great customer service.”

It was a tough vision-Abcam was created to sell the best antibodies in the world with the most comprehensive, honest and up-to-date datasheets, fast delivery, helpful customer service and comprehensive technical support. Abcam also offers an ever expanding portfolio of assay kits.

Several years on and with thousands of products across our range, Abcam ships to scientists in over 75 countries around the world. Abcam is committed to the following fundamental principles that have seen us become the first choice for thousands of life scientists throughout industry and academia:

- Quality of products and datasheets
- Helpful technical support and online technical resources
- Friendly customer service
- Fast delivery

## Comprehensive

We have a policy of honesty – our customers know everything that we know about our products, as soon as we know it. Everything we know about each product is posted on the datasheet. To achieve exceptional levels of quality for our customers we provide:

- Comprehensive datasheets
- Customers' Abreviews® of our products
- Product-specific protocols used by our customers
- Customers' technical questions and our answers for each product
- Product information and new products updated daily

## Helpful

Our Scientific Support and Customer Service departments are full of scientists that have many years of experience working with the types of products that we supply to our customers.

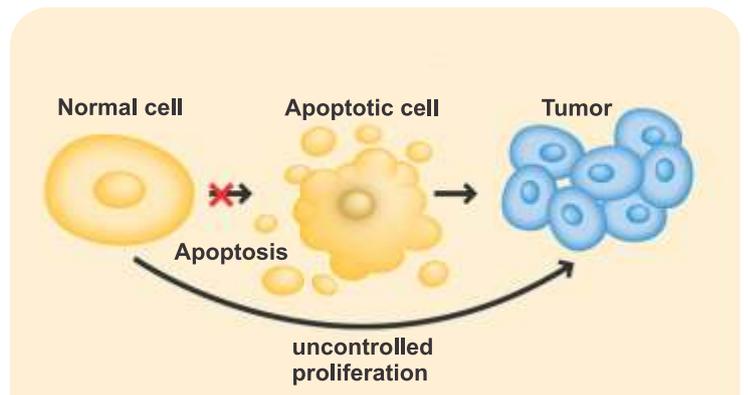

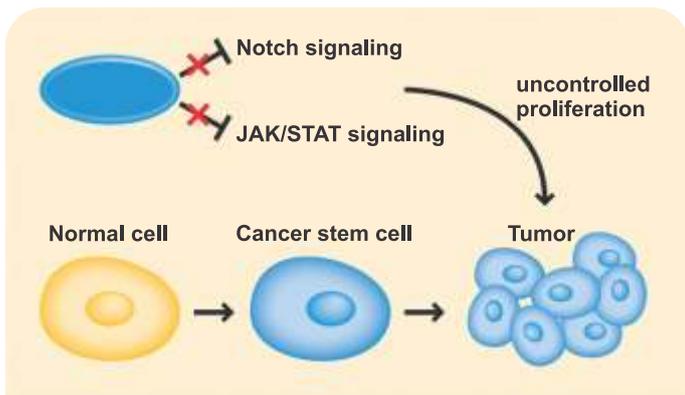

We provide continuous order progress updates, so that you always know what is happening with your order and when you should expect receive it.
